

Juan Carlo

THE
COMMISSARY

COMMISSARY

After years of working at the top of the industry with high-profile clients, a new vision was born; that of luxury service and delivery under the brand Juan Carlo - Catering to those with a finer taste. To realize that vision, a new commissary with state of the art facilities was established at the center of Batangas City in 2013.

KITCHEN

The commissary boasts of an exceptionally spacious 600 sqm. kitchen with a stainless steel finish for corrosion and heat resistance, hygienic food preparation, and easy maintenance. A grease trap for every sink is designed to intercept most grease and solids before disposal of wastewater and the trench drain ensures a rapid evacuation of the surface water. The non-slip floor minimizes hazards while the industrial exhaust system allows a conducive working environment for the kitchen team.

The LPG gas runs in a pipeline with a safety valve to prevent gas leakage in the cooking area. Four individual fire suppression systems were installed and class K fire extinguishers are on hand for an enhanced fire control system. A comprehensive pest control system is in place, highlighted by electric insect fly traps with a glue board system.

We do not allow any stone unturned in coming up with a clean and safe food production area.

RATIONAL SELF-COOKING MACHINE

Our two Rational Self-cooking Machine can do the following functions: baking, steaming, roasting, frying, pan-frying, poaching, proofing, blanching, steam baking and dehydrating at the touch of a button.

They can yield:

480 pieces	Chicken	35 minutes
500 pieces	Salmon and Blue Marlin	12 minutes
480 pieces	Caramel Custard	18 minutes
480 pieces	Rocky Road Brownies	10 minutes

HIGH AND LOW PRESSURE COOKERS

For one viand, using our 12 high-pressure cookers and 6 low-pressure cookers we can cook up to 5, 400 guests in 2 hours.
(Time may vary depending on the dish.)

INDUSTRIAL RICE COOKER

Stainless Cabinet Type Rice Cooker
Industrial Rice Cooker

500 guests
60 guests

With one cabinet type rice cooker and 8 industrial rice cooker,
they can yield 1, 500 guests worth of rice in 2 hours.

FREEZERS & CHILLERS

Walk-in Freezer and Chiller

Upright 6 door
Industrial Freezer

Chest Type Freezer

We have an 8,000 mm x 3,000 mm x 2,600 mm walk-in freezer and chiller. In addition, we have two 6 door industrial chillers and one 6 door industrial freezers, size of each are 1,812 mm x 800 mm x 2,040 mm and 7 chest type freezers as back up food storage during peak season.

COLD KITCHEN

An air-conditioned area to attain the optimum temperature needed to prepare salads, desserts, cold appetizers, and processing of cakes, bread and pastries.

HEAVY DUTY MIXERS

Small	50 pieces	10 minutes
Medium	200 pieces	10 minutes
Large	500 pieces	10 minutes

Our industrial mixers are used for preparations for large quantities of dough for bread, cake and muffin mixtures. Overall they can yield 2,000 cupcakes in 10 minutes.

STOCK ROOM

Our air-conditioned stockroom serves as the storage for our catering supplies; ensuring the optimum temperature conducive for our stocks.

As part of our JCSYS programme, we have an inventory, purchasing and receiving management module for the systematic and streamlined operation of our stockroom.

We also have an LCD monitor that provides visual management on the real-time updates of the expiration for all our inventory items to prevent spoilage.

INDUSTRIAL DISHWASHING MACHINE

Our industrial dishwashing machine enables the washing and subsequent drying of the entire crates of flatware, dinnerware, glassware and holloware. We utilize a liquid dishwashing soap and drying agent (products of chemlux); where the utensils come out of the machine squeaky clean & sanitized by heat.

20 pieces plates	1 minute and 10 seconds
48 pieces highball glass	1 minute and 10 seconds
25 pieces goblets	1 minute and 10 seconds
150 pieces spoon and fork	1 minute and 10 seconds
20 pieces soup bowl	1 minute and 10 seconds
30 pieces saucers	1 minute and 10 seconds
25 pieces coffee cups	1 minute and 10 seconds
25 pieces salad plates	1 minute and 10 seconds

LINEN

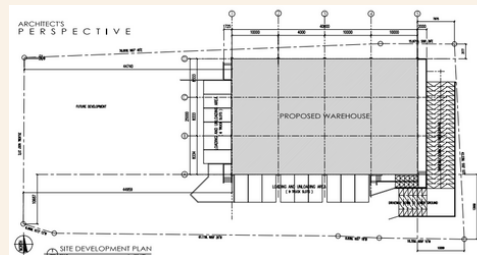

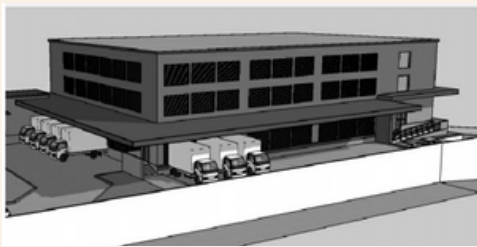

Each industrial laundry washing machine can run a cycle of 30 kilograms of linens and different types of fabrics in 40 minutes.

WAREHOUSE

Warehouse 1

Warehouse 2

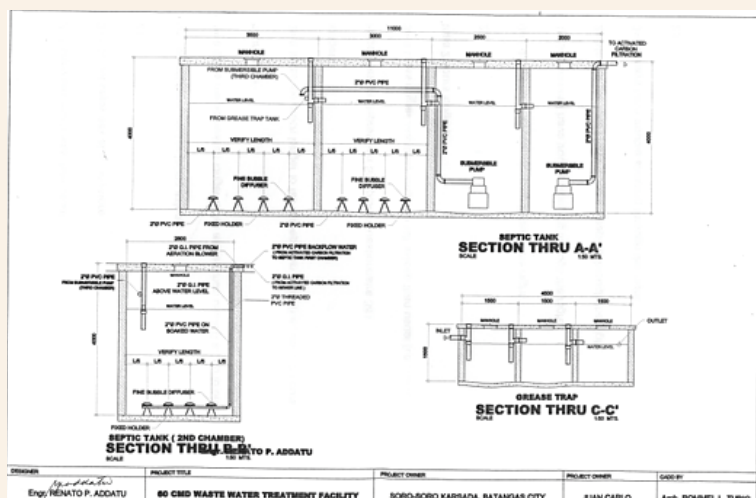

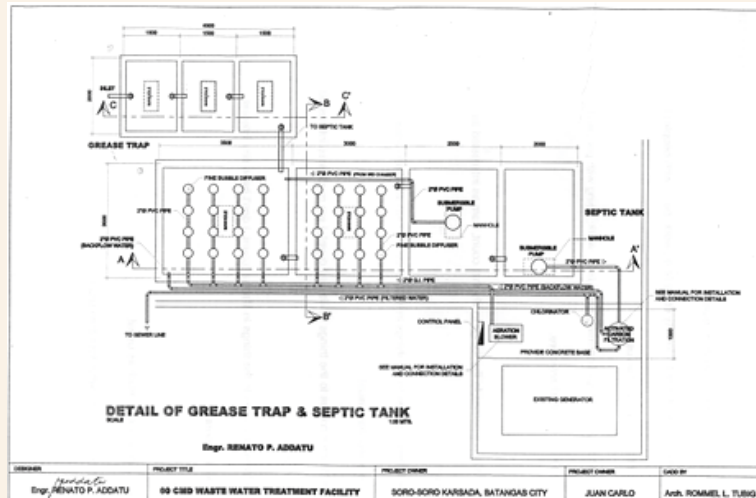

Warehouse 1 is 800 square meters while warehouse 2, is situated at a half-hectare property 3 minutes away from the main commissary. It has a floor area of 1,000 square meters. When combined they can occupy 252, 214 items and equipment.

GENERATOR AND ELECTRONIC POWERED DEEP WELL

Redundancies for water and electrical supply through an electric-powered deep well and a 100 KVA industrial generator to ensure 100% continuity and delivery of our services to all our clients.

WASTE WATER TREATMENT FACILITY

To comply with the government's thrust of preserving the environment, we set up our own water treatment facility designed to treat our waste water to make it acceptable for environmentally safe discharge back into the water cycle.

OFFICE

General Office Area, and Conference Room

Divided into 9 departments, our general office area has the capacity of over 50 people.

The conference room serves as a multi-function area for intimate gatherings, company meetings, training, spiritual wellness activities and food tasting for our clients. This also serves as our "War Room" where exchanges of ideas and strategies take place. Serving as the birthplace for innovation at Juan Carlo.

PRAYER ROOM

God-centeredness is really at the core of who we are as an organization. This conviction is the reason why we created a dedicated place for our people to find solace and privacy, for reflection and meditation amidst the busy workplace.
